

FREIGHTER

FREEZ-R

Freez-R is expertly designed to deliver industry leading thermal performance, keeping your temperature sensitive freight at the optimal temperature no matter the journey.

FREIGHTER

Whether your journey takes you cross-country or through urban towns, the Freez-R high performance refrigerated trailer delivers peace of mind every step of the way.

Backed by an industry leading national dealer and service support network, Freez-R delivers exceptional thermal performance and reliability through the combination of engineered Ferroplast technology insulation, with a proven locally manufactured chassis design.

Features & Benefits

- Constructed from Ferroplast technology, comprising of a high performing polyurethane hard foam core with a coated metal skin, ensures zero water ingress and crack resistance
- The combination of high thermal performance, with enhanced thermal breaks, achieves significant fuel savings and reduced fridge operating costs
- The inclusion of the 4-lip door seal keeps cold air inside the trailer, adding to the overall thermal performance
- Push-to-roof double loader system eliminates the need to move bars in and out of the trailer, saving time and improving operator safety, while the recessed design maximises internal width space and reduces the chance of accidental forklift damage
- TrailerConnect® telematics allows operators to access real time information about the trailer, delivering load performance management and maintenance planning capability

All Freighter Freez-R trailers are backed by Freighter Group's national dealer and service support network.

Key Specifications (Nominal)

Length: 7,495mm (lead) 13,540mm (tag)

Overall Height: 4,300mm

Internal Length: 7,205mm (lead) 13,240mm (tag)

Internal Width: 2,407mm

Internal Height: 2,650mm (lead) 2,700mm (tag)

- Dost Double Loader
- Aluminium circulation wall
- TrailerConnect® Telematics Pro 12 month subscription
- Provision for Dynamic Ramp Protection (DRP)
- Hella LED lighting
- Your choice of preferred body mounted refrigeration plant

Configuration
